GEERPRES®

We're more than just metal!

Do you know what's new?

Disposable Microfiber Mops

There are many instances where disposable microfiber mops which costs \$1.99 each is desired and makes more economic sense than a traditional, launderable microfiber mop that costs approximately \$6.00 each. For example:

- **Applying floor finish with our C.A.T.** – many users simply don't want to launder a mop that is saturated with floor finish and they throw away the launderable mop. With our new disposable microfiber mop, you can now throw the inexpensive mop away after use.
- **Healthcare** – clean up of infectious waste. The inexpensive disposable mop can be treated as hazardous waste and "red bagged" for disposal.
- **Retail outlets** – many retail outlets that have hard floors, may not have the equipment or the space available to have laundering equipment. Using a disposable mop better fits their needs.

Item number - 4828

Pack – 50 per carton

MSRP- \$1.99 each / \$99.50 carton
